REPORT

OF THE

COUNTY

LUNATIC ASYLUM,

NEAR GLOUCESTER.

1859.

GLOUCESTER:

E. NEST, PRINTER AND BOOKSELLER, 155, WESTGATE STREET.

Officers for the Year.

Visiting Magistrates for the County.

The Right Hon. the Earl Ducie
John Curtis Hayward, Esq., CHAIRMAN
Purnell Bransby Purnell, Esquire
Thomas Barwick Lloyd Baker, Esquire
John Altham Graham Clarke, jun., Esquire
Robert Pavin Davies, Esq.
Thomas Frobisher, Esq.
Charles Brook Hunt, Esq.
The Reverend Samuel Lysons

Nathaniel Samuel Marling, Esquire
Thomas Gambier Parry, Esquire
Thomas Aylmer Pearson, Esquire
The Reverend Thomas Peters
John Bransby Purnell, Esquire
The Reverend Thomas Purnell
George Ruddell, Esquire
William Nash Skillicorne, Esquire
Rayner Winterbotham, Esquire

Visiting Justices for the City.

Richard Helps, Esquire, Mayor | David Mowbray Walker, Esquire

Physician-Superintendent.

W. W. Williams, M. D., M. R. C. P. L., F. L. S., &c.

Assistant Medical Officer.

Mr. Francis Wilton, M. R. C. S., &c.

Matron.

Miss Bishop.

Chaplain

The Rev. Herbert Haines, M. A.

Steward and Clerk, and Clerk to the Visitors.

Mr. James Stephens.

R E P O R T

OF

THE VISITING JUSTICES.

The following Report of the Visitors of the Lunatic Asylum at Wotton, in and for the County of Gloucester, made in accordance with the provisions of the Lunatic Asylums' Act, 1853, was laid before the Epiphany Court of Quarter Sessions, held at Gloucester, for the County of Gloucester:—

The Visitors are happy to be enabled to congratulate the County in having now, for the first time, an asylum sufficiently capacious to accommodate all the pauper lunatics of the county.

The number of pauper patients, now that all such belonging to the county and city of Gloucester who are known to have been retained in other asylums or licensed houses have been received, amount to 471, besides whom there are 11 pauper patients belonging to other counties or boroughs not contributing, and 6 private patients, making a total of 488, while the present accommodation extends to 625, and may, by slight adaptations, be increased to 650, sufficient, it is hoped, to meet the requirements of the county for several years to come. Indeed, there are already indications which lead the Visitors to hope that, now the county is in a position to afford the utmost facilities for every case effected by insanity being at once received, so as to admit of this dire malady being grappled with in its earlier stages, it may

not be found to be so fearfully on the increase as has been generally supposed. The experience of one year is too short to draw any safe conclusion from, but, as far as it goes, it shews rather a diminution of new cases.

The total of admissions for the year 1859 have been 176, against 129 in the year 1858. But of the former, 54 were cases received from other asylums or licensed houses, who had only waited for admission to the County Asylum till there was room to receive them there. Exclusive of these 54 and the 7 private patients, there have been only 115 admissions this year, against 129 in 1858, and 141 in 1857. How far this diminution may be maintained remains to be proved, but its existence even for this year, affords some encouragement at the commencement of a new era.

Of the 176 admissions in 1859, 94 have been males, and 82 females: the generality of whom, including, almost without exception, those who have come from other asylums, have been of a chronic and very unpromising character: so that not more than 51 have presented any reasonable prospect of cure; and there were only 40 cases deemed curable, remaining in the house at the close of 1858. From these, 53 have been discharged cured, and 7 relieved—a very favourable proportion of such cases.

The deaths have amounted to 53, being 14 less than last year, though the number treated has been so much greater: and, of these deaths, 31 have occurred from old age, generally paralysis, or epilepsy, several of them having been admitted in an extremely low and feeble condition, one not having survived three days.

The general health of the patients has been very good. The small pox broke out about the close of 1858, and prevailed for some months, attacking nearly 40 of the patients, and causing one death: the rest have done well and retain now no trace of the disorder.

The officers and attendants have suffered more from sickness, attributable in some degree to the more than ordinary anxiety and labour thrown upon them by almost all the cases of recurrent mania, having, in a singular manner, become unusually excited at the same

time—about the end of May, and continuing so for some weeks, without any assignable cause. The same phenomenon seems to have occurred in other asylums.

The Superintendent's new house has been completed and in occupation since Midsummer, which has afforded increased means of accommodation in the Asylum.

The main buildings also, which have been in the course of alteration or reconstruction for so many years, are now completed; and the wing injured by the fire, completely restored; but much still remains to be done in reforming and laying out the pleasure grounds; but this will be accomplished by the patients and household staff. Some farm buildings have become necessary, in order to carry out, properly and profitably, the cultivation of the land in occupation.

The want of a constant and sufficient supply of water for daily use, and also as a security in case of fire, is still the great deficiency of the institution. It is hoped that the Gloucester Board of Health will be able to supply this, but no arrangement can be made till their works at Witcomb are completed.

A large proportion of the male patients continued to be employed in the cultivation of the garden and farm, and in the alterations of the airing and pleasure grounds.

The women find full occupation in the work-room, wash-house, and laundry. Abundant means of occupation are among the most essential adjuncts to a curative establishment. The visitors have agreed to rent between five and six acres of pasture land adjoining their other grounds, which will afford increased means of recreation.

The amusements which have been carried on for several years, are still continued. The harvest-home and other parties, which are looked forward to as yearly treats, have this year been varied by a concert of Mr. Morgan and his Juvenile Band, and recitations by Mr. Walter Montgomery, which were highly appreciated and enjoyed.

The privilege of permitting patients occasionally to visit their homes and other places, which was adverted to in our last report, has been much extended this year, and (with two exceptions) without

any drawback, to the great gratification of the patients and their friends.

The visitors have taken advantage of the provisions of the 43rd section of the Lunatic Asylums' Act to admit a certain number of private patients, at a charge of 12s. per week; the difference of 3s. 6d. per week being considered a fair addition for rent upon the original outlay and yearly cost of repairs, &c. paid by the county. This charge will be diminished when the charge for paupers is lowered. The admission of such patients, while there is room for them, will not only be a source of profit, tending to lower the cost of pauper patients, but may be of essential service to a class of persons just above paupers, who have hitherto found it difficult to procure admission to any proper asylum; and, from being neglected, have too frequently, at last, found their way to the County Pauper Asylum, as hopeless chronic cases, after the season for cure had been allowed to pass away.

There have been seven private patients received—two chronic cases from other asylums (one of whom was admitted at the special request of the Commissioners in Lunacy), one other in the last stage of brain disease, and four recent cases, of whom three have been already discharged cured.

The visitors need scarcely add any comment to shew the importance of early admission; but they desire earnestly to call the attention of all parties interested in those attacked with insanity, and particularly union and parish authorities, to the paramount necessity of sending such patients as early as possible for regular treatment, if they have any desire for their cure.

J. CURTIS HAYWARD, *Chairman.*
